

# Traffic Automated Processing (TAP)

Custom Integration • Voice • Data • Process Automation

Web Interface

Improve Data Accuracy

Exception Processing

Reliable Performance

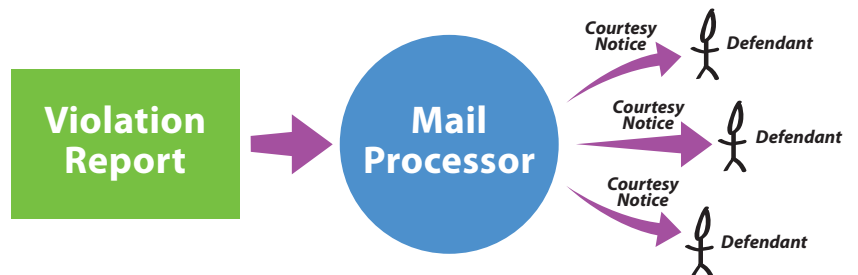

Windows Server Platform

ATI's **Traffic Automated Processing** module (TAP) increases your Court's efficiency by automating the processing of traffic convictions and courtesy notices. TAP will save most courts many hours by automating the redundant tasks related to traffic violations.

## How It Works

### Courtesy Notices

Weekly, Court staff use our convenient Web interface to launch reports of violations requiring courtesy notices. Once the report is submitted, your mail processor will create letters to the defendants. Up to three courtesy notices can be sent prior to final conviction.

### Auto Convict

The Court staff is able to produce a list of cases that have not been responded to by the pay or appear date. The report can be given to a judge for final approval and cases can easily be marked for removal from the auto convict process. Once the report is submitted, our **Auto Convict** module:

- Disposes of all charges and the case
- Creates sentences
- Lists any open items
- Interfaces with the Court's collection agency if required

A final conviction notice is created for the defendant and sent to your mail processor. For tracking purposes the case management system is updated with the history of notifications sent on the case.

# Traffic Automated Processing (TAP)

## **How It Works** *(continued)*

The **Traffic Automated Processing** module is flexible to meet the unique needs of your Court. With the ease of use and minimal maintenance requirements, increased staff productivity occurs very quickly after deployment.

- Convenient Web interface that integrates your entire case management system
- With automation (and elimination of human error), data entry accuracy will increase
- Exception processing to remove certain cases from conviction list
- Runs on an industry standard Windows server platform
- Built with ATI's Interactive Platform to ensure reliable performance and future growth (shared platform for other Court applications)

## **ATI offers Interactive Voice and Web Response applications for courts of all sizes.**

*These applications include, but are not limited to:*

- *Jury Interactive* Phone Module
- *Jury Interactive* Web Module
- Jury Appointment Reminder Calls
- *Traffic Interactive* Phone Module
- *Traffic Interactive* Web Module
- *Criminal Interactive* Phone Module
- *Criminal Interactive* Web Module
- Live Contact Center Agent Support – Screen Pop
- *Proceedings* – Real-Time Courtroom Processing
- VoIP Telephone and Contact Center Systems
